4. World Missions Alliance ministers outside of the USA - the Voltage is 220. Voltage transformers are not encouraged. They normally create more problems than they help. Hair dryers are provided at the hotel. You will be able to charge laptops and cell phones if you purchase a suitable **plug adapter**. These can be purchased at Walmart; Kmart; Radio Shack or any other travel store. Know the difference between an adaptor and a converter [note: a converter is used to convert the voltage of an electric device. For example, if your hairdryer requires 110V, you will need a converter when traveling to Europe, which runs on 220V. An adapter allows you to plug your American two-pronged plug into a different outlet. Use this for dual-voltage devices; for example, your laptop computer and cellphone charger.]
